

NEW RELEASE

SPGPRINTS B.V. 10.2.2

4th december 2023

New!

What's new:

Calibration Wizard

- Added add/remove button for managing schemes.
- Enabled automatic measurement saving.
- Resolved DRD window issues.
- Introduced an option for using 51 patch targets for linearization/DRD.
- Incorporated print statistics feature for every sample copy in the Calibration Wizard.

Input Defaults

- Added a new setting to Input Defaults allowing scale file preview when opening a document in neoStampa.

Control Center

- Launched the neoQRReader iOS app in a Control Center style for improved user experience.
- Now we have the capability to designate the public IP for generating the pairing QR code on the workstation. Subsequently, when scanning the pairing QR code, we will utilize the designated public IP.
